Invitation

It is with great pleasure we invite you to the 2008 International Shoulder Course in Naples, Italy, about arthroscopy, prosthesis and fractures.

The program includes lectures by leading shoulder surgeons, round table discussions, live surgery sessions and workshops by faculty demonstrations. This meeting, supported by the efforts of three different scientific Societies, has the purpose of gathering the Italian and international scientific communities, in particular the Mediterranean countries, in a unique educational and cultural project on the shoulder.

In recent years shoulder surgery has changed and developed enormously. Arthroscopy has allowed a different approach to supposedly well-known pathologies like instability, showing different patho-anatomy lesions which require different solutions using scope or open procedure. Similarly, arthroscopy has modified the treatment of rotator cuff lesions, prompting more and more surgeons to repair them using less invasive techniques, and the treatment of complex situations.

Together with innovations of arthroscopic shoulder surgery and shoulder arthroplasty, surgeons also have more possibilities to use different kinds of implants adapted to different pathologies. Indications on using resurfacing, modular anatomical systems or inverse prosthesis need wider discussion in the scientific community.

Finally, in fracture treatment, old techniques have been improved and new possibilities have arisen thanks to new implants, especially in the angle of stability, nail, hemiarthroplasty or reverse prosthesis.

The International Shoulder Course will be hosted at Hotel Royal/Continental, Naples, from the 16th to 18th October 2008.

The Organizing Committee looks forward to receiving your registration and to seeing you in Naples.

Yours sincerely,

The Organizing Committee

WELCOME TO NAPLES!

Naples is a fascinating city, rich in history, culture, art, nature and tradition. The territory was first colonised in the 9th century BC, almost 3000 years ago when "Anatolian and Achaean merchants and travellers arrived in the gulf, on their way to the rich mineral areas of the High Tyrrhene", and founded Partenope in the area which includes the isle of Megaride (the present-day Castel dell'Ovo) and the Mount Echia Promontory (the present-day Monte di Dio and Pizzofalcone).

Buildings, churches, streets, ancient fortresses and castles in the sea, as well as natural caves and places impregnated with mystery and mysticism, all of which makes Naples unforgettable in the minds of all travellers. Not only natural stages, but symbolic places of the city, an integral part of its history, of mythology and the legends that have touched it.
