SIGASCOT Fellowship in Luxembourg
General information
Program

Dr Pietro Spennacchio (Humanitas Hospital Milan)

Dr Silvana De Giorgi (Policlinico in Bari)

The Luxembourg Olympic Medical Center is proud to have been selected to host the Sigascot Sports Medicine Fellowship, the Sigascot has organised in previous years in cooperation with the German Society of Orthopaedic Sports Medicine (GOTS). The Luxembourg Olympic Medical Center has been created in 2008 in order to harmonize and improve sports medicine care in athletes of all levels in Luxembourg in close cooperation with the National Sports Federations. Starting from 7th of July of this year, the Sports Medicine Research Laboratory of the Public Research Centre for Health has been added to this structure and is currently in full development. The structures are all located within or close to the 'Centre de l'Appareil locomoteur, de Médecine de Sport et de Prévention' at the Clinic d'Eich which is part of the Centre Hospitalier of Luxembourg.

The goal of this structure is to cover a broad range of aspects in sports medicine from a clinical, scientific and educational perspective.

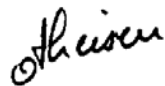

We express a warm welcome to Dr Pietro SPENNACCHIO from Milan and Dr Silvana DE GIORGI from Bari and wish them a fruitful fellowship.

Prof. Dr Romain SEIL

Prof. Dr Axel URHAUSEN

Priv.-Doz. Dr Dietrich PAPE

Prof. Daniel THEISEN, PT, PhD
